KristianKiel

Challenger Automatic

INSTRUCTIONS MANUAL

CAUTION

Do not adjust the big date between 20:00 and 04:00 positions. The process now is automatic and the movement could be damaged.

NOTES

Before using the watch for the first time turn the crown and wind it in order to get the movement going. You will see how the "Power Reserve" indicator moves from (-) to (+). Keep the watch away from high temperatures and strong magnetic fields as this could alter its accuracy.

FUNCTIONS

Button "A" adjusts the date function (button can be push just with a pen).

Crown sets the time. Just pull it and turn it clockwise.

24hrs Hand: Show the time in a 24 hr display around the main dial. It's already synchronized and can't be changed.

We hope you enjoy your Kristian Kiel timepiece!
