Traveller World-Time

**INSTRUCTIONS MANUAL**

**A:** World cities dial.    **A':** Crown that moves **A**.    **B:** 24 hrs dial.  
**C:** Dial indicating current time.    **D:** Hand indicating the time in dial B.  
**D' :** Crown to set up the current time (in its second position, when pulled out turning it upwards). Also moves **D** (in its first position turning it downwards). It will also change the date when in its first position turning it upwards.

Once you have set the time and date, by turning **D'** crown in its second position (i.e. 6 PM in dial C), locate the same time in the 24 hrs dial **B** (18:00 hrs). Then turning **A'** we align the time of the city where we are (dial **A**) with the present time (i.e. if we are in Malaga, the equivalent in the dial is Paris, GMT + 1). Now we can tell the current time in any of the cities shown in dial **A**. If you wish to follow up the time in a particular city (i.e. Tokyo) turn the **D'** crown in its first position until the hand **D** reaches the time we have in Tokyo (02:00 hrs). From now on, hand **D** it always indicates to you (in dial **B**) the current time in Tokyo. ▶
